

Sample Handling

Solutions for sample processing in the clinical laboratory

Sample Processing

False bottom tubes - the optimal solution for laboratory automation

- Now available in 15 mm Ø and 13 mm Ø
- For direct analysis of decanted serum/plasma yields
- Rounded base versions available to accommodate rack requirements

Inserts

- Convenient for small volumes and direct analysis in analyzers
- Primary tube with identification is retained, preventing sample mix-up associated with secondary tubes

StackPack Tubes

- Convenient, compact StackPack packaging
- 40% space savings compared to bulk packaging
- Available in a range of dimensions commonly required for secondary tubes

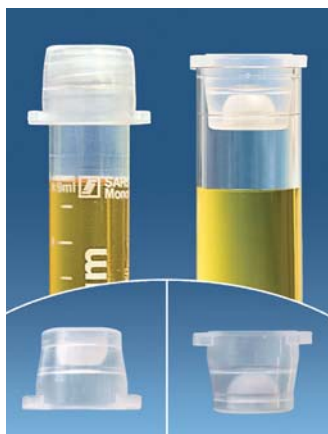

Sample Processing

Block racks - for efficient and economic sample storage

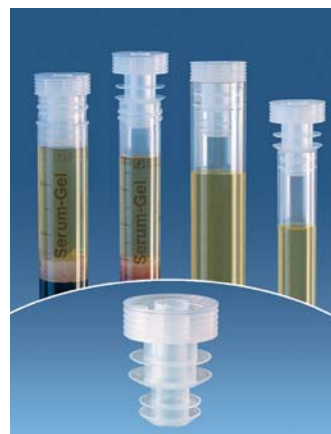

- Block rack with 13 mm Ø apertures
- Compact sample storage and organization
- Up to 9 colors provide coding options
- Available with or without handles
- Autoclavable and suitable for use in dishwashers
- Double block rack featuring 100 apertures available with 17 mm Ø (connected at lateral or front end)

Anti-Evaporation Protection - hygienic and convenient to use

- Universal cap: Can be used in two different positions to fit most tubes

- Archiving cap: Suitable for all standard blood collection systems or tubes from 13 to 16 mm Ø

- Anti-evaporation caps for S-Monovette® 15 mm Ø

- Protective cover for block rack to protect open tubes (17 Ø) awaiting processing

Tubes with round base in StackPack (without cap)
